Fhis clone is from an A. gambiae BAC library (ND-TAM) provided by
F.H. Collins and sequenced by The Institute for Genomic Research
(TIGR). The BAC library was generated from A. gambiae PEST strain
DNA. All DNA was extracted from newly hatched first instar larvae
to minimize the inclusion of DNA from microorganisms that inhabit
the gut. The DNA is derived from mixed sexes of larvae. The BAC
library was constructed at Texas A&M University BAC Center
University, College Station, Texas 77843-2123, USA using a HindIII
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             437 GCAACACGTTCT-----GCAAAAAGTATTTCAGACATTGCAGGGACGTGTAT 390

This clone is from an A. gambiae BAC library (ND-TAM) provided by
F.H. Collins and Sequenced by The Institute for Genomic Research
(TIGR). The BAC library was generated from A. gambiae PEST strain
DNA. All DNA was extracted from newly hatched first instar larvae
to minimize the inclusion of DNA from microorganisms that inhabit
the gut. The DNA is derived from mixed sexes of larvae. The BAC
library was constructed at Texas A&M University BAC Center
University, College Station, Texas AMW University BAC using a HindIII
                                                                                                                                                                           AG-ND-13701.TR.1 ND-TAM Anopheles gambiae genomic clone AG-ND-13701.

                                                                                                                                                                                                                                                                                  F.H. Collins and sequenced by The Institute for Genomic Research (TIGR). The BAC library was generated from A. gambiae BST strain DNA. All DNA was extracted from newly hatched first instar larvae to minimize the inclusion of DNA from microorganisms that inhabit the gut. The DNA is derived from mixed sexes of larvae. The BAC library was constructed at Texas A&M University BAC Center University, College Station, Texas 77843-2123, USA using a HindIII partial digest.

Seq primer: M13 For Class: BAC ends.

This clone is from an A. gambiae BAC library (ND-TAM) provided by
This clone is from an A. gambiae BAC library enough genomic Research
F.H. Collins and sequenced by The Institute for Genomic Research
(TIGR). The BAC library was generated from A. gambiae PEST strain
DNA. All DNA was extracted from newly hatched first instar larvae
to minimize the inclusion of DNA from microorganisms that inhabit
the gut. The DNA is derived from mixed sexes of larvae. The BAC
library was constructed at Texas A&M Universty BAC Center
University, College Station, Texas A?N43-2123, USA using a HindIII
Seq primer: MI3 For
Class: BAC ends.

This clone is from an A. gambiae BAC library (ND-TAM) provided by FH. Collins and Sequenced by The Institute for Genomic Research This clone is from an A. gambiae BAC library was generated from A. gambiae PEST strain DNA. All DNA was extracted from newly hatched first instar larvae to minimize the inclusion of DNA from mixcoorganisms that inhabit the gut. The DNA is derived from mixcd sexes of larvae. The BAC library was constructed at Taxas Adw University BAC Center Darvae: Adv. Darvaer BAC Center Darvae: Adv. Darvaer BAC Center Darvaer: Adv. College Station, Texas Adv. This clone is from an A. gambiae BAC library (ND-TAM) provided by
This clone is from an A. gambiae BAC senomic Research
(TIGR). The BAC library was generated from A. gambiae PEST strain
DNA. All DNA was extracted from newly hatched first instar larvae
to minimize the inclusion of DNA from microorganisms that inhabit
the gut. The DNA is derived from mixed sexes of larvae. The BAC
library was constructed at Texas A&W Universty BAC Center
University, College Station, Texas A?7843-2123, USA using a HindIII
Seq primer: MI3 Rev
Class: BAC ends.

This clone is from an A. gambiae BAC library (ND-TAM) provided by F.H. Collins and sequenced by The Institute for Genomic Research (TIGR). The BAC library was generated from A. gambiae PEST strain DNA. All DNA was extracted from newly hatched first instar larvae to minimize the inclusion of DNA from microorganisms that inhabit the gut. The DNA is derived from microorganisms that inhabit the gut. The DNA is derived from microorganisms that inhabit the gut. The DNA is derived from microorganisms that inhabit the gut. The DNA is derived from microorganisms that inhabit library was constructed at Texas A&M University BAC Center University, College Station, Texas 77843-2123, USA using a HindIII partial digest.

                                     /Clone=lib=Pirellula marina Lambda Zap Express Library"
/clone=lib=Pirellula marina Lambda Zap Express BamHI arms; Site 1:
BamHI; Site_2: BamHI; Purified genomic DNA from Pirellula
marina was restricted with BclI to give fragments of 2-9kb
and ligated into the BamHI sites of the Lambda Zap Express
vector. The ligated DNA was packaged into digapack Gold
III phage heads. B.coli XLI-Blue MRF' was infected with
the packaged phage. Recombinant phage plaques were picked
and stoored in phage storage buffer (PSB). Phage/PSB was
used as template for PKR."

Consortium/LLNL at: http://image.llnl.gov Series: IRAL Plate: 36 Row: a Column: 3
This clone was selected for full length sequencing because it passed the following selection criteria: matched mRNA gi: 7662155
This clone has the following problem: frame shifted.
